Press Note

TIM: leader in sustainability joins the Euronext Vigeo Eiris World 120

The Group is also confirmed in the Eurozone 120 and Europe 120 indexes, as in the last years

Rome, 28 November 2017

New international recognition for TIM’s commitment to green issues: for the first time the Group has made it onto the “Euronext Vigeo World 120” index, which considers the first 120 companies out of the 1500 listed with the highest level of floating capital in Europe, North America and the Asia Pacific region as of December 2017/May 2018.

TIM’s position has also been confirmed in the “Euronext Vigeo, Eurozone 120” and “Euronext Vigeo Europe 120” indexes, which rank the 120 listed companies with the highest level of corporate social responsibility in the Eurozone and Europe. These indexes, published twice a year, recognise companies with the best environmental, social and governance performances.

The Euronext Vigeo Eiris indexes include companies that have achieved the highest scores in the six-month assessment, basing the evaluation on 330 indicators in 6 thematic areas: environment, corporate governance, human rights, human resources, business conduct, and community involvement. The scores are assessed by the Agency using the Equitics methodology.

Inclusion in the three Euronext Vigeo Eiris indexes comes in addition to the leading global sustainability indexes in which TIM is already present, among others: Dow Jones Sustainability Index World and Europe, FTSE4Good, and iCarbon Disclosure Leadership Index.
